## 2014 PROVISIONAL SUMMARY OF RESULTS

## INTRODUCTION

The Junior Certificate Examination (JCE) assesses achievement of learners who have completed three years of secondary education. The 2014 JCE assessed candidates on seventeen (17) syllabi, one (1) of which was available to private candidates only. The assessment was carried through written examinations, practical examinations and coursework assessment. There was a total of forty-nine (49) papers comprising of; eleven (11) multiple choice papers, twenty seven (27) open-ended or free response papers, eight (8) coursework components and three (3) practical examinations. The 2014 examination is the third assessment on the revised curriculum that was introduced in 2010. The main thrust of the revised curriculum is to provide learners with pre-vocational preparation through knowledge and selected practical experiences as well as building a foundation that enables individuals to cultivate manipulative ability, positive work attitudes and ultimately making informed choices for future careers. In response to this, BEC developed new sets of assessments aimed at supporting the new curriculum by bringing out of the learners important skills which will position the candidates for the world of work and vocational preparedness as well as preparing them for long life learning. Thus, standardbased grading was introduced in 2012, continued for the 2014 JCE. Candidates were graded in all the syllabi they sat for

For the award of a JCE qualification, candidates were graded on 7 syllabi as follows:

- Candidates taking Setswana were graded on seven syllabi, which include English, Setswana, Mathematics, Science/General Science, the best syllabus from the optional group and the best two from the remaining syllabi.
- Candidates exempted from Setswana were also graded on seven syllabi, which include English, Mathematics, Science/General Science, the best syllabus from the optional group and the best three from the remaining syllabi.
- Private candidates who sit between one and six syllabi in any given year can be considered for the award of an overall grade after they have completed seven syllabi in a maximum of 5 consecutive years.

The 2014 JCE Summary Results Report is structured as follows: -

- Candidature
- Overall Performance
- Performance by Subject
- Performance by Gender
- Performance by Education Region
- Observations at Subject Level

The total number of candidates who satisfied the requirements of the 2014 Junior Certificate Examination (JCE) is 40559 which is an increase of $4.2 \%$ from the 2013 candidature. There were 19963 male candidates and 20596 female candidates. Among all subjects, English has the highest number of candidates who set for the examination, followed by Mathematics and the least is French. Art and Music has shown an increase in candidature.

> Generally the overall results of 2014 JCE are more or less the same as the 2013 across various grades. About $34.6 \%$ of the candidates have been awarded grade C or better compared to $35.3 \%$. Two (2) candidates have satisfied the award of merit. At grade B there is a slight improvement of $0.2 \%$ between 2013 and 2014 . The proportions of candidates obtaining lower grades D to U are increasing from 2012 to 2014 . This is graphically presented in figure 2.1 .
> X denotes failure to meet grading requirements for the award of a qualification.
> U denotes failure to meet minimum requirements at grade E

Fig. 2.1: Overall Candidate Performance in 2012, 2013 and 2014

It is much evident from the graphical display that the candidates in 2012 performed better than the 2014 candidates. The proportion of candidates awarded grades A to C were much higher in 2012, followed by 2013 and lastly 2014. However, in Grade A and B, year 2013 and 2014 are slightly comparable. The 2014 year has higher proportion of candidates awarded grades $\mathrm{E}, \mathrm{U}$ and X .

| Total | 40559 |  |  | 1495 | 100 |  | 39064 | 100 |  |  |

Nationally, the higher proportion of candidates obtained grade D (31.8\%) whereas for Back to School Candidates, most candidates obtained E and U. The proportion of candidates awarded grade D is also higher for Non Back to School category.

The figure shows that without Back to School there is an increase at grade $D$ and above, for example grade B increased by $0.3 \%$, grade C by $0.8 \%$, grade by D $0.5 \%$.

Back to School candidates increased the proportions of grade E by $0.5 \%$, grade $U$ by $0.6 \%$ and candidates not meeting the requirement of the qualification by $0.7 \%$.

### 2.1 COMPARISION OF OVERALL GRADES BY TYPE OF CENTRE

Fig. 2.3: Percentage Comparison of Overall Grades by Type of Centre

Government centres are the only ones which obtained a Merit and recorded the highest proportions in the grades A to D. BOCODOL has the highest proportion of grade U followed by Private Centres. BEC Centres have the highest proportion of candidates who did not meet the requirements of the qualification $(X)$.

## 3.0: PERFORMANCE BY SUBJECT

Table 3.1: Percentages of candidates awarded Grade C or better by subject in 2012, 2013 and 2014

|  | 2012 (\%) | 2013 (\%) | 2014 (\%) | \% Difference |

| MUSIC | 18.7 | 24.8 | 23.1 | -1.7 |
| PHYSICAL EDUCATION | 16.4 | 14.4 | 17.2 | 2.8 |

Most subjects show an insignificant increase or decrease in cumulative percentage of candidates obtaining grade C or better. English, Design and Technology, Art and Physical Education are the only subjects obtaining a significant increase in cumulative percentage of candidates at grade C or better. A decline in performance was recorded in Setswana and Mathematics. Across all subjects less than $50 \%$ of the candidates are obtaining grade C or better with the exception of Art.

### 3.1 PERFORMANCE IN 2014 CORE SUBJECTS

All subjects have the highest proportion of candidates at grade D or lower, for example Setswana and English have the highest proportions at grade D, while Mathematics and Science at E. The exception is Social Studies which has a peak at C . The performance distribution depicted at each level is skewed to the right implying large proportion of candidates obtaining lower grades as compared to lower proportion of candidates obtaining a higher grade A to C in these core subjects. This signifies a low performance especially for Core subjects which are taken as the cornerstones of candidates learning and development.

The same picture observed in Core subjects can be seen in Practical subjects. More candidates are grouped at grades D or lower. However, it is encouraging that Art has the highest proportion of candidates at grade C .

## 4.0: PERFORMANCE BY GENDER

Gender differential in overall pass grade is more evident at grades B and C, where females are out-performing their male counterparts. It is also evident at lower grade E and U when males out number females.

Table 4.1 depicts performance of females over years. For grade A, most subjects show an increase in female performance. Only Setswana, Music and Physical Education registered a decline between 2013 and 2014. Setswana also registered a decline at grade B; but Music experienced an increase. A high proportion of females, $39.2 \%$ obtained a grade C in Art, followed by Social Studies and English. The females recorded a high proportion of grade $U$ in General Science (over 40\%) in 2013 and 2014.

There are more males obtaining grade $C$ in Art compared to other subjects; the trend is consistent over the 3 years. It is evident that fewer males are able to obtain Grade A or B in all subjects between 2012 and 2014. Art is the only subject which had a high proportion of grade C, more than $30 \%$ across the 3 years. The males recorded a high proportion of grade U in French, more than $47 \%$ in 2013 and 2014. Males also have a high proportion of grade $U$ in Commerce and Office Procedures, Commerce and Accounting of over 30\% in 2013 and 2014.

Fig. 4.2: Overall Grade Percentages by National Regions

Fig. 4.2 shows the regional differences in candidates' performance. South East ( $1.8 \%$ ) is leading in grade A, followed by North East (1.5\%). More candidates are getting grade B in South East (15.2\%), followed by North East (14.7). Kgalagadi and North West regions have the lowest grades of $A$ to $C$ and high proportions of grades $E$ and U.
