

## INTRODUCTION

The Junior Certificate Examination (JCE) assesses the achievement of learners who have completed the last three years of the 10-year Basic Education Programme. The 10-year basic education curriculum blueprint outlines subject specific learning outcomes and skill areas that cut across all subject areas. The curriculum and examinations at the junior secondary level, put emphasis on understanding and application of concepts; development of inquiry, decision making, reasoning, creative, analytical, problem solving and process skills and the acquisition of hands on experience that should increase the participation and performance of all groups e.g. groups of different abilities, learners with special needs, girls and boys. All these skills entail more practical and challenging content that require higher levels of engagement of a learner's cognitive ability that are commonly referred to as High Order Thinking skills (HOTS).

A total of 206 school centres and 45 private centres registered candidates for the 2009 JCE. The 2009 JCE assessed, for the second time, candidates in the 4 junior secondary schools that introduced 'double shift' in 2006. The JCE examination papers were administered from 26 October to 6 November, 2009. Marking of examination scripts started on the $1^{\text {st }}$ of December and was completed on the $17^{\text {th }}$ December 2009.

The 2009 JCE Summary Results Report is structured as follows:

- Candidature
- Overall Performance
- Performance by Subject
- Performance by Centre
- Performance by Gender
- Performance by Education Region

- The total number of candidates who satisfied the requirements of the 2009 Junior Certificate Examination (JCE) is $\mathbf{4 0 1 8 0}$
- Out of the $\mathbf{4 0 1 8 0}$ candidates, $\mathbf{3 8 1 1 4}$ were school candidates, while $\mathbf{2 0 6 6}$ were from private centres.
- The number of school candidates meeting the requirements of 2009 JCE increased by 1421 from last year's figure of $\mathbf{3 6 6 9 3}$; while the number of private candidates increased by $\mathbf{6 3 0}$ from last year's figure of 1436.
- These figures show a higher proportionate increase in the number of private candidates compared to school candidates.
- There were 19534 male candidates and 20646 female candidates.
- All the subjects showed an increase in candidature except Design and Technology.
